

Theodoros Samaras received the Physics degree from the Aristotle University of Thessaloniki, Greece, in 1990; the MSc degree in Medical Physics from the University of Surrey, UK, in 1991; and the PhD degree from the Aristotle University of Thessaloniki, Greece, in 1996. In 1998, he joined the BIOEM/EMC Group, at the Swiss Federal Institute of Technology (ETH) in Zurich, where he was mainly involved with studying the temperature increase, due to the absorption of electromagnetic energy in tissues, and the effect of heat diffusion in electromagnetic dosimetry. He subsequently moved to the Hyperthermia Unit, Erasmus Medical Centre of Rotterdam, where he conducted research on treatment quality of superficial microwave hyperthermia with a Marie-Curie Fellowship from the European Commission. In December 1999, he returned to the Aristotle University of Thessaloniki, where he is currently a Professor. His research interests include numerical techniques and computational multiphysics in biomedical technology and telecommunications, as well as therapeutic applications and safety of non-ionizing radiation and electromagnetic fields. He has (co-)authored more than 80 peer-reviewed articles. He is a member of the European Commission's Scientific Committee on Health, Environmental and Emerging Risks (SCHEER).
